“Les Françaises” – The French Women – with this simple yet telling exhibition title the native Parisian photographer **Sonia Sieff** (*1979) makes her debut in Germany on **8 March 2018** at the Munich gallery **IMMAGIS**.

The series of works, for which the daughter of legendary photographer Jeanloup Sieff invited both famous and lesser-known French women to pose before her camera, comprises 155 photographs that serve as the basis for this solo exhibition.

Her sensitive, discreet, and almost androgynous approach to nude photography is revealed in a selection of some 35 images, set in opulent hotel sceneries à la Bettina Reims, amidst refined architecture in daring outdoor shots, or in titillating detail shots.

More information will follow shortly.
